Forward-Looking Statements

During the course of this presentation, we may make forward-looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC.

The forward-looking statements made in this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward-looking statements we may make. In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

All other brand names, product names, or trademarks belong to their respective owners. © 2019 Splunk Inc. All rights reserved.

Backward Looking Statements

This presentation contains backward looking statements regarding events in the past. We caution you that such statements reflect our imperfect memory and that actual events or results could differ materially. The backward-looking statements made in the next few slides are being made as of the time of the authoring of this presentation. If reviewed prior to such authoring, time and space may become unstable and the product, the conference and the known universe will become* subject to change without notice.

*(willan on becomen)

Nick Mealy = madscient = sideview

Former Mad Scientist and Principal UI Developer at Splunk 2005-2010

This is Rob and I in the booth at Linuxworld in 2005, the week we launched Splunk 1.0.

Splunk – Timeline of early releases

Demos as "Oplicity" and "Transaction Engines" - 2004

2 Alpha releases – March/April 2005

Beta 1, 2, 3 4 – May 2005

1.0 GA – August 2005 (LinuxWorld)

2.0 - Late 2005 or early 2006

3.0 - August 2007

4.0 – July 2009

(the rest of the talk was live
demos of 1.0, 2.0.X and 3.4.14)

Where we ate robin's minstrels.

And there was much rejoicing.

Oh and we segfaulted 3.4.14 as our finale.
